MIAP research dataset report

Pseudonym DEMO-004 · generated 2026-11-10 09:13 UTC

Pseudonymised research output. It contains no patient identity and no clinical review notes; the pseudonym is the research key.

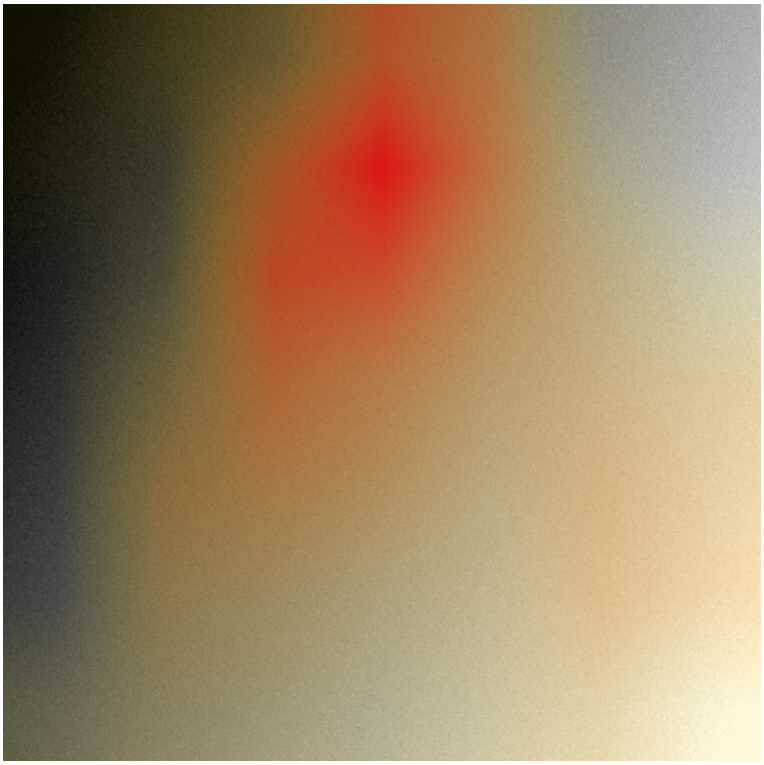

Pseudonym	DEMO-004
Consent	research
Modality	xray
Region / view	chest
Model	chest_densenet121 xrv-0.1
Model digest	c8f0ada55b4c059bf07ead3b4702e5f1
Provenance	p_5c3d2a2c-dff5-4c2f-ba44-e2cfa0f65721
Analysis job	j_6ef9bcfc-56d5-4247-86f2-0195d66436d1
Result	r_8ef9a885-e5d9-47fc-b652-fa3c0f6bfdd0

Model output

Scores are uncalibrated model outputs, not probabilities of disease. Bands are qualitative thresholds applied for review triage.

Finding	Score	Threshold	Band
Lung Opacity	0.901	0.50	Worth reviewing
Effusion	0.852	0.50	Worth reviewing
Pneumonia	0.799	0.50	Worth reviewing
Enlarged Cardiomediastinum	0.754	0.50	Worth reviewing
Consolidation	0.743	0.50	Worth reviewing
Atelectasis	0.696	0.50	Worth reviewing
Mass	0.615	0.50	Worth reviewing
Edema	0.612	0.50	Worth reviewing

Local clinician agreement: 1 confirmed, 0 dismissed, 7 not reviewed. This is review agreement on this dataset, not model accuracy. Notes are withheld from research reports.

Primary class-activation map overlaid on the de-identified image. It shows where the model looked, not proof of a finding; the model input is the centre square, so the overlay covers that region.

Provenance

Runtime	torch-cpu · Python 3.13.1
Platform	Windows-11-10.0.26200-SP0
Code commit	2e710bf
Input size	224
Normalisation	torchxrayvision.datasets.normalize(img, 255)
CAM layer	features.norm5
Seed	0

Warnings

- Decision support only. This output is not a diagnosis.
- The heatmap shows where the model looked, not proof of a finding.
- Model: chest_densenet121 xrv-0.1.
- Trained on non-African populations; performance may not transfer.
- Labels are dataset annotations, not confirmed diagnoses.
- Portable or scanned films and unusual windowing may degrade results.
- The heatmap shows where the model looked, not proof of a finding.

Validation: No validation on Ugandan or local patients. Upstream public-dataset performance only; no local benchmark has been run.

Decision support only. This report is not a diagnosis and must not replace review by a qualified clinician.

Technical record

Model chest_densenet121 xrv-0.1 · digest c8f0ada55b4c059bf07ead3b4702e5f1 · result r_8ef9a885-e5d9-47fc-b652-fa3c0f6bfdd0 · job j_6ef9bcfc-56d5-4247-86f2-0195d66436d1 · provenance p_5c3d2a2c-dff5-4c2f-ba44-e2cfa0f65721 · template 3.1.
